WORK FROM HOME APPLIANCE

" Finally an Indian Product company based out of Bangalore provided us with a solution to access Tally and other application servers from home without a need of Terminal Server, VDI and CAL licenses. The solution works exactly like how we use Tally and other applications from office, simple to use, faster and safer. The product has built-in web security functionality and detailed reports for every employee activity in the office network"

WHAT IS TOW

"TALLY" - Work From Home was not comfortable before TACITINE introduced the new TOW (Tally On WAN) technology.

Now with TOW, you can work TALLY at your home almost at the same speed of working from your office Desktop. It has been successfully tested and implemented in many auditing firms, Companies

and Various Manufacturing Industries; they have all acknowledged the higher performance.

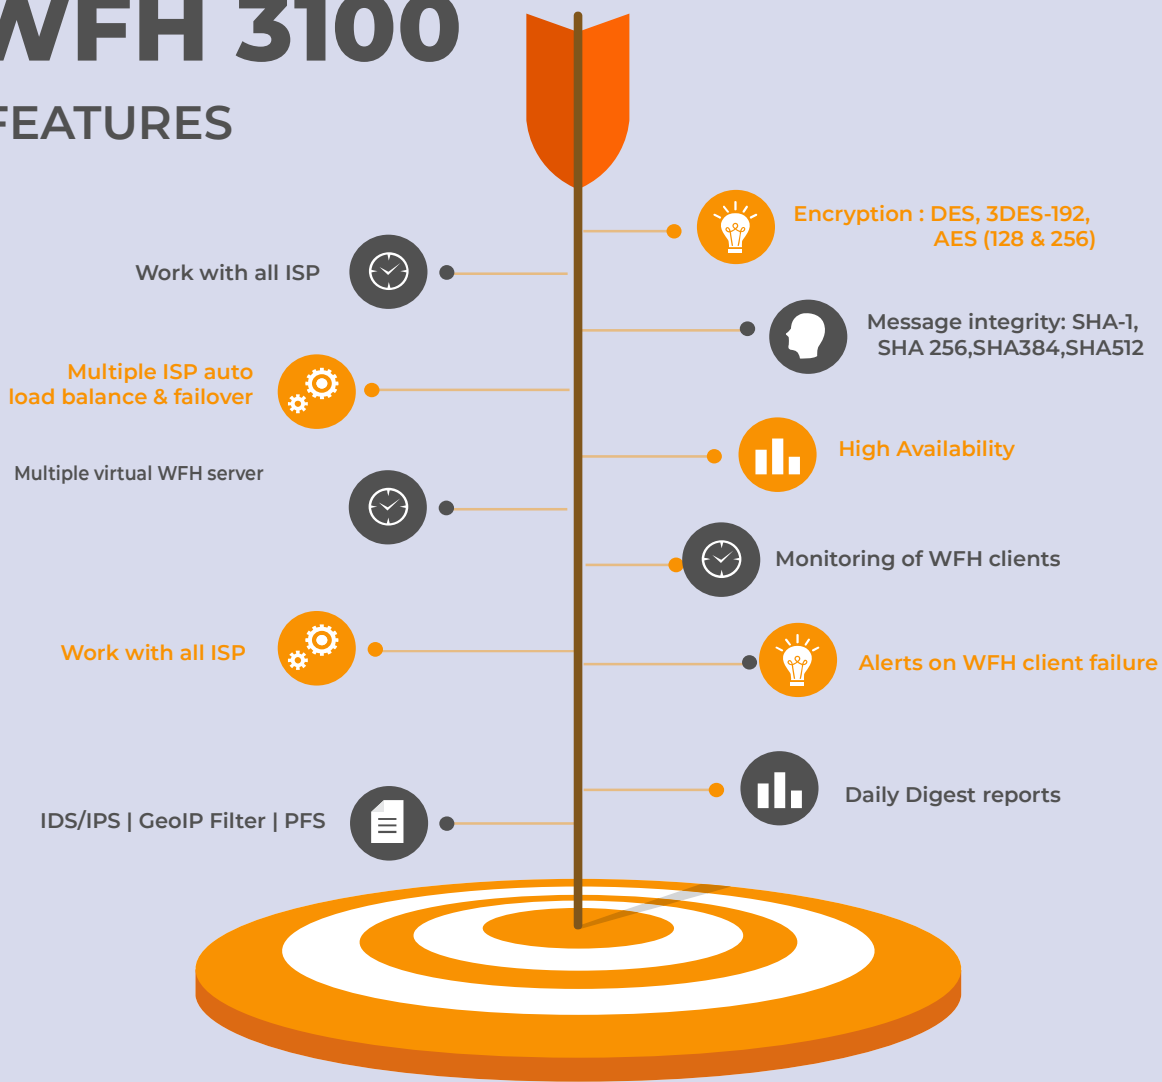

The best part of TACITINE TOW technology is NO need for additional licenses like RDP, CAL, Cloud or others. No need for any further investment on the servers. It's just a matter of TOW enabled appliance with the reasonable speed of Internet bandwidth in your office. Later you can upgrade the same device as the world-class Information Security Firewall; its an added benefit comes at almost no extra cost.

work from home

WFH 3100
